

## MDG Me2

### Installation

- Connect the gas inlet to a gas bottle equipped with a regulator. The gas inlet is an Oxygen Adaptor (9/16-18 R.H).
- Connect the data wiring (Male XLR-5 connector for DMX/RDM) if you are using a DMX or RDM controller.
- Connect the power cord 100-250 VAC, 50/60 Hz, 1415W.
- Open the gas bottle (CO<sub>2</sub> or N<sub>2</sub> industrial grade, over 99% of purity), and **set the regulator pressure between 50 and 60 psi** (3.5 and 4.1 bar, or 350 and 410 kPa).
- Fill the reservoir with **MDG Neutral Fog Fluid**.

Power ON the MDG **Me2**.

### Working with the keyboard (LOCAL Mode)

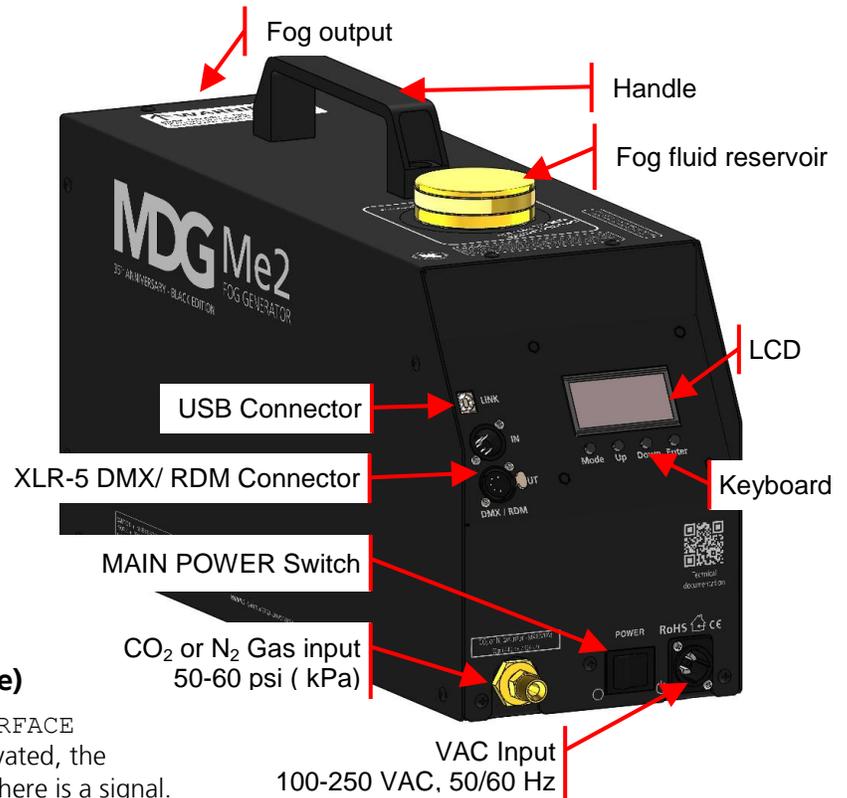

- Verify the communication mode in the «INTERFACE ▶ COMM. ». When the «AUTO» mode is activated, the MDG **Me2** is then controlled by DMX, only if there is a signal. If the DMX wire is unplugged, the control remains local.
- When the generator is manually switched to «UNIT ON» mode («CONTROL ▶ UNIT ▶ ON»), the program starts the heating cycle for approximately 8 minutes («STATUS ▶ STATE = % HEAT»). When the temperature reaches operating level, the Automatic Purging System™ (APSTM) will be initiated («STATUS ▶ STATE = PURGE»). After the first purging cycle is completed (1 min), the generator is ready to produce fog («STATUS ▶ STATE = READY»).
- To produce Fog, switch the generator to «FOG ON» mode («CONTROL ▶ FOG ▶ ON»). The MDG **Me2** will start to produce fog right away. Fog emission can be controlled by adjusting the working pressure of the internal reservoir («CONTROL ▶ PRESSURE»).

The MDG **Me2** will produce fog as long as the control parameters are within specifications, the fog fluid reservoir filled and the gas bottle pressurized.

If a critical problem occurs, the fog generator automatically shuts down, and displays an error message in the **Status Menu**.

The most common errors are (check the manual for more details):

- |                    |  |
|--------------------|--|
| • ERROR = P. LOW   | Gas bottle is probably closed, empty or not connected. Check also the regulator pressure.    |
| • ERROR = P. HIGH  | The input gas pressure is too high (Pressure between 50-60 psi / 3.5-4.1 bar / 350-410 kPa). |
| • ERROR = HEATER   | Check the AC voltage.  |
| • ERROR = PCB HIGH | Move the generator to a colder location.   |

## Working with DMX/RDM Control (DMX Mode)

- Connect a DMX line to DMX In connector ( Male XLR-5 connector).
- Select the communication mode in the «INTERFACE ▶ COMM. ». When the «AUTO» mode is activated, the MDG **Me2** is then controlled by DMX, only if there is a DMX signal.
- Set the DMX Start Address in the Interface Menu («INTERFACE ▶ COMM. ▶ DMX ADDR»), and choose any value between 1 and 510 (512, last DMX channel).

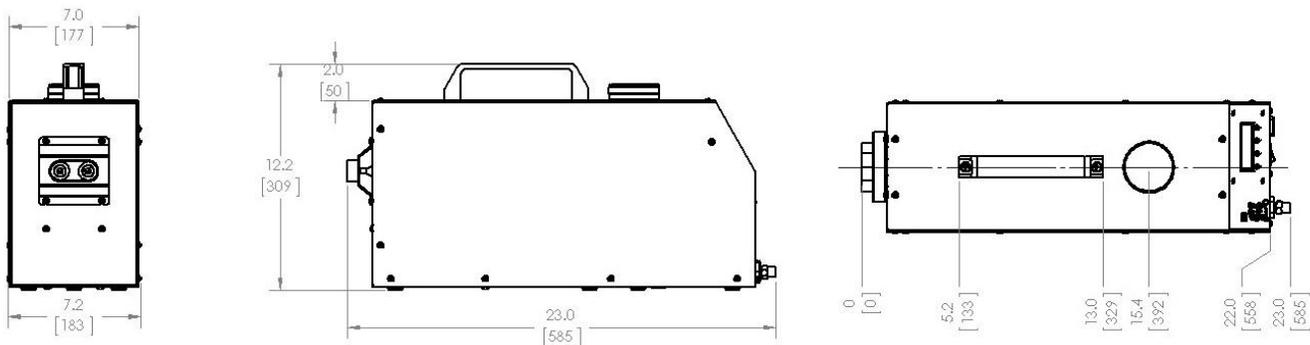

*The DMX Start Address can be reassigned via a RDM control.*

The generator uses three (3) DMX channels:

- Channel 1            **0 (0%)**        < UNIT OFF    ≤ **128 (50%)**        < UNIT ON        ≤ **255 (100%)**
- Channel 2            **0 (0%) – 255 (100%)**, FOG OUTPUT (from minimum to maximum)
- Channel 3            **0 (0%)**        < FOG OFF     ≤ **128 (50%)**        < FOG ON        ≤ **255 (100%)**

## Technical Specifications

Maximum fog output (per minute):	200 m <sup>3</sup> (7,063 ft <sup>3</sup> )
Fog colour:	Pure white
Particle size:	0.5 to 0.7 microns
Fluid consumption:	2 L (59.5 oz / 0.53 US gal) per hour at 2.76 bar / 40 psi
Fluid type:	MDG <b>Neutral™ Fog Fluid ONLY</b> M.S.D.S. available on request
Fluid reservoir:	2.5 l (0.66 US gal) bottle
Gas type:	Industrial Grade CO <sub>2</sub> or N <sub>2</sub>
Gas pressure input:	4.15 bar / 60 psi max
Gas consumption:	2.68 kg (5.9 lb) per hour at 2.76 bar / 40 psi
Operating voltage:	100-250 VAC, 50/60Hz, 1 phase, 1415 W Ground / Earth connection <b>REQUIRED</b>
Operating temperature:	0 °C to 50 °C (32 °F to 122 °F)
Operating humidity:	90 % relative humidity @ 50 °C (122 °F), non-condensing
Storage temperature:	-40 °C (-40 °F) to 60 °C (140 °F)
Storage humidity:	80% relative humidity @ 60° C (140 °F)
Approval	CE, CSA and UL pending
Dimensions	30 cm (12") H x 18 cm (7") W x 61 cm (24") L
Weight:	17 kg (37 lb)

... For further details, please read the **Operating Guide**.
